

Kingfisher Class Newsletter

Friday 20th March 2026

This week in Kingfisher Class...

Maths: We started the week by measuring in centimetres and metres. We then compared and ordered different measures.

English and DT: It has been a busy week this week as the children have been evaluating wheeled mechanisms and finding out about chassis, axles, axle holders and wheels. Kingfishers have investigated, designed and made a moving trolley, working to a design criterion. They explained what the trolley was for and who would use it. They problem solved when things went wrong and helped each other with their constructions.

Notices and messages:

1. Next week, we will be evaluating our wheeled trolleys. Please discuss with your child something that they really liked about their model and something that they would change to make it even better!
2. Hopefully, the sunny weather has finally arrived and is here to stay! Please feel free to send your child to school with a named sunhat.
