

Kingfisher Class Newsletter

Friday 1st May 2026

This week in Kingfisher Class...

English: Well done to all of the Kingfisher children who stood up in assembly on Tuesday to perform *On the Ning Nang Nong* to the whole school. The children projected their voices well and played their instruments with great timing. Well done everyone! We have also had a go at writing some rhyming couplets of our own and some alliterative sentences.

Maths: We began the week by finishing off our work on fractions. We counted in fractions and the children made a paper pizza to demonstrate this. We then moved onto telling the time (o'clock, half past, quarter past/to). Well done to everyone who has been working hard at home and practising this very important skill.

Science: This week, we have been learning about animals, including humans. We started off the week with a cold task where we asked the question, *How do humans change as they grow?* and *How does a caterpillar change into a butterfly?* We then learnt about the life cycle of a butterfly and looked closely our own caterpillars before noting our observations in our butterfly diary.

Notices and messages:

1. Monday is a Bank Holiday so there will be no cricket this week. We will have P.E as normal on Wednesday.
2. A polite reminder that no ornaments, toys or games should be brought in from home to school. We are happy for children to bring in work they have completed at home or books they would like to share with the class. Over the past few weeks, we have blown away by the amazing maths work and poetry completed at home.
3. Now that the weather is sunny, please remember to send your child to school with a sunhat.
